POLICY

The protection and preservation of the environment is of fundamental concern to Anritsu Company. We will make our best efforts to conduct our business operations in accordance with sound environmental practices, and with respect for local, state and federal conservation rules, laws, regulations and standards. Anritsu strives to give due consideration to the environment in both the development and manufacture of our products. Through sincerity, harmony, and enthusiasm, we will endeavor to foster a prosperous society at one with nature.

To meet the objective of this Policy, we strive to:

- Avoid pollution
- Protect the environment by reducing the amounts of solid and liquid waste generated by our operations.
- Prolong the useful life of non-renewable resources
- Ensure continual improvement in environmental performance
- Comply with applicable legal and other requirements relating to the company's environmental aspects

Further the company intends

- To set and review relevant environmental objectives and targets
- To reduce consumption and waste wherever practicable and reasonable
- To encourage our suppliers to have similar environmental aims

This policy is communicated to all employees, persons working for or on behalf of the company and to the public when requested. It has the full support of senior management and is an extension of the Anritsu Corporate Environmental Policy. The Anritsu Company United States environmental management system shall be documented, Implemented, and maintained to the extent necessary to uphold this policy.

PURPOSE

To provide guidance to all company employees regarding the need to conserve and be environmentally conscious.
